

HOPEN TICKET

An open and innovative
ticketing system

Interoperability

Hopen Ticket adapts to the frequency of travel by rethinking and favouring public transport. Integrated services ensure a seamless customer journey using the same media. The solution is flexible. It adjusts to multi-operator networks and promotes multimodal travel (train, bus, tram, bike, carpooling, etc.).

360° vision

Hopen Ticket is a comprehensive ticketing system: from ticket sales to clearing through validation and inspection. Our System is modular and tailored to fit the size and type of network (school, inter-city, urban or regional). It can grow and adapt according to your requirements, whilst optimizing operating costs.

Analysis

Hopen Ticket integrates an efficient reporting tool that monitors the ridership of the various modes. Thus Transport authorities can assess the time and place adequacy of their transport offer compared to demand. The relevance of the data collected measures the concrete impact of disruptions and incidents on passengers journey.

A MODULAR SYSTEM

HOPEN TICKET CONSISTS OF 4 PRODUCT RANGES
